

User Acceptance Testing (UAT)

Date	26 June 2026
Team ID	
Project Name	Software Installation Request Automation
Maximum Marks	

Project Overview:

Project Name: Software Installation Request Automation

Project Description: A ServiceNow-based automation system that streamlines software installation requests using Service Catalog, Flow Designer workflow, Business Rules, and email notifications

Project Version: 1.0

Testing Period: 20 June 2026 to 28 June 2026

Testing Scope:

Features to be Tested:

- Service Catalog item submission with 4 variables
- Flow Designer workflow — approval and task creation
- Email notifications on approval and rejection
- Business Rule — incident creation on On Hold state
- Service Portal search and submission
- Update Set export and import

User Stories to be Tested:

USN-1, USN-2, USN-3, USN-4, USN-5, USN-6, USN-7, USN-8, USN-9

Testing Environment:

URL/Location: <https://dev378029.service-now.com/sp>

Credentials (if required): 927623bad092@mkce.ac.in & Appukutty@193

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass /Fail
TC-001	Submit software request via Service Portal	1. Open /sp portal 2. Search catalog item 3. Fill all 4 variables 4. Click Order Now	sc_request and sc_req_item records created in ServiceNow	Records created successfully	Pass
TC-002	Email notification on submission	1. Submit catalog request 2. Check requestor email inbox	Email received confirming request submission	Email received with request number	Pass
TC-003	Approval routing via Flow Designer	1. Submit request 2. Check sysapproval_approver table	Approval record created and routed to Manager/IT Admin group	Approval record created correctly	Pass
TC-004	Approve the request	1. Open approval record 2. Click Approve	sc_task created and assigned to Software Support Team	sc_task created successfully	Pass
TC-005	Reject the request	1. Open approval record 2. Click Reject	Email notification sent to employee informing rejection	Rejection email received	Pass
TC-006	Task fulfillment by IT team	1. Open sc_task 2. Change state to Work in Progress 3. Change to Completed	Request moves to Closed Complete state	Request closed successfully	Pass
TC-007	Business Rule — On	1. Open sc_task 2. Change state to On Hold	Incident auto-created	Incident created automatically	Pass

	Hold incident		with license unavailability details assigned to Software Support		
TC-008	Service Portal search by meta tag	1. Open /sp 2. Search meta tag name given to catalog item	Catalog item appears in search results	Item found in portal search	Pass
TC-009	Update Set export and import	1. Export Update Set as XML 2. Import to another PDI 3. Commit Update Set	All records transferred with no missing elements	Update Set committed successfully	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No bugs found — all test cases passed	N/A	N/A	Closed	All workflows and catalog items functioning as expected
